ENVIRONMENTAL ACTION

Hydramix is a powerful drying agent that helps to:

- Reduce bacterial growth
- Reduce environmental fly activity
- Provides improvements in slurry quality
- Provides a non-slip surface reducing the risk of injury to live stock
- Assists in odour control
- Can be used to lime small paddocks and for horticultural applications

WHERE CAN HYDRAMIX BE USED?

- Cow cubicles
- Calving pens
- Lambing pens
- Lambing creeps
- Poultry/game sheds
- Loose housing
- Stock sheds
- Around water troughs
- Feed troughs
- Walk-ways
- Yards

EASY TO APPLY

Hydramix can be used mixed with straw or sawdust or used on its own. Easy to apply by hand with a scoop and bucket/wheel barrow or mechanical dispenser.

Usage is 500g per m² or per cubicle per day. Usage rates may vary in line with farming practice.

EFFECTIVE AGAINST BACTERIA

Protects poultry of all ages against:

- 🐔 **SALMONELLA**
- 🐔 **E-COLI**
- 🐔 **AVIAN INFLUENZA**
- 🐔 **AND OTHERS DISEASES**
