

INTRODUCING

AgriSan™

AgriSan™ is a powerful new addition to the bedding powder family, developed for farms needing superior moisture control and reliable disinfectant performance.

By combining advanced absorbent minerals with targeted antimicrobial ingredients, AgriSan™ helps maintain drier, cleaner and more hygienic bedding environments in even the most challenging shed conditions.

Key benefits:

DEFRA-approved disinfectant

Improved flowability for even spreading

Rapid moisture absorption

Longer-lasting to reduce the need for reapplication

Enhanced pH management

Ideal for challenging shed conditions

AgriSan™ can be applied across multiple livestock systems:

Cows

Pigs

Poultry

Designed for environments with high moisture load, stocking density and pathogen pressure.

AgriSan™ delivers advanced bedding hygiene for farms that need more than drying alone.

Active ingredients:

Trisodium orthophosphate:

High-alkalinity salt that raises pH to suppress bacteria.

Chabasite:

Porous natural zeolite that rapidly absorbs moisture.

Chloramine T:

DEFRA-approved strong disinfectant and antiseptic antimicrobial agent.

Kaolin and clay:

Improves application flow and provides steady drying and a stable, non-slip surface.

Eucalyptus:

Natural extract with antimicrobial and strong deodorising properties.
